Class Diagram
Application
1
1
Main
+ start(Stage primaryStage): void
+ main(): void
+killProcess(): void
1...*
OtherForms
- primaryStage : Stage
+ start(): void
+ killProcess(): void
Control
+ outputBoxes: Text
+ handler(): void
There will be many handler methods
SystemLogic
- total: double
- subTotal: double
- itemPrice: double
- name: String
- lookName: String
- lookPrice: String
- calculateTax(): double
+ login(String userID, String pass): void
+ scan(String prodCode): void
+ calculateSubTotal(): double
- voidAll: void
I think this covers everything we need for logic. I didn't include any getters
